

Dark Ritual

The gods are fickle, my friend. If you want a sure thing, look for corruption and venereal disease in Marienburg.

Game Length

The game lasts 6 Turns.

Deployment and First Turn

Normal rules, use the attached deployment zone.

Scenario Special Rules

Sacred Sites

There are two sacred sites (represent these using 40mm objectives). At the end of the game, whoever has more non-fleeing US within 6" of the sacred site controls it. A Beastmen player may replace one sacred site with a Headstone but must pay for the Headstone in their muster list. At the start of the game, the Attacker may move each sacred site up to 3".

Channel/Drain Energy

All wizards know the following spells in addition to their normally generated spells:

Power Ritual (Enchantment, 8+/11+, range 12"): This spell must target a *Sacred Site*. If it is successfully cast with a casting value of 8+, add one dice to the *Ritual Dice* pool. If it is cast at +11, add two dice to the *Ritual Dice* pool instead.

Impede Ritual (Hex, 8+/11+, range 12"): Same as *Power Ritual* but it removes dice from the *Ritual Dice* pool.

Ritual Dice

Throughout the game, keep track of the number of dice in the *Ritual Dice* pool.

Dice can be added or removed as follows:

- The pool starts with one dice per ritual preparation. See the #wttj-tracker channel on Discord.
- Casting *Power Ritual* or *Impede Ritual*
- Killing a character in combat or running them down adds/removes one dice.
- At the end of the game, whoever controls each *Sacred Site* may add or remove two dice from the pool.

Victory!

At the end of the game, roll all of the dice in the *Ritual Dice* pool. If the sum of all the dice is **25** or higher or if **all of the dice show a 6**, the ritual has been successfully performed and the Dark Gods are unleashed upon Lustria. Otherwise it has failed and the gods show little interest in your petty schemes.

Both players receive two goal points at the end of the game.
