

Ambush!

Francis eyed the trees to his left nervously. Beasts, elves, rats, goblins, who know what lurked just out of sight....

Deployment

See map and detailed instructions

Game Length

Play four turns. After turn four, roll a d6.

On a 4+, play one more turn.

First Turn

The Attacker goes first.

Scenario Special Rules

The Messenger

After deployment but before the first turn, the Defender must designate one infantry or cavalry character or champion to be the Messenger. If the Messenger is a champion, they may leave their unit at any time and become a character. The Messenger gets +2M and a 6+ ward save.

Baggage Train

To destroy the baggage train, a unit moves into base contact with the train during the remaining moves phase and must still be there and have at least US 5 at the start of that player's next turn. It cannot shoot or cast spells while destroying the baggage.

At the end of the game, whichever side has more US within 6" of the baggage train controls it.

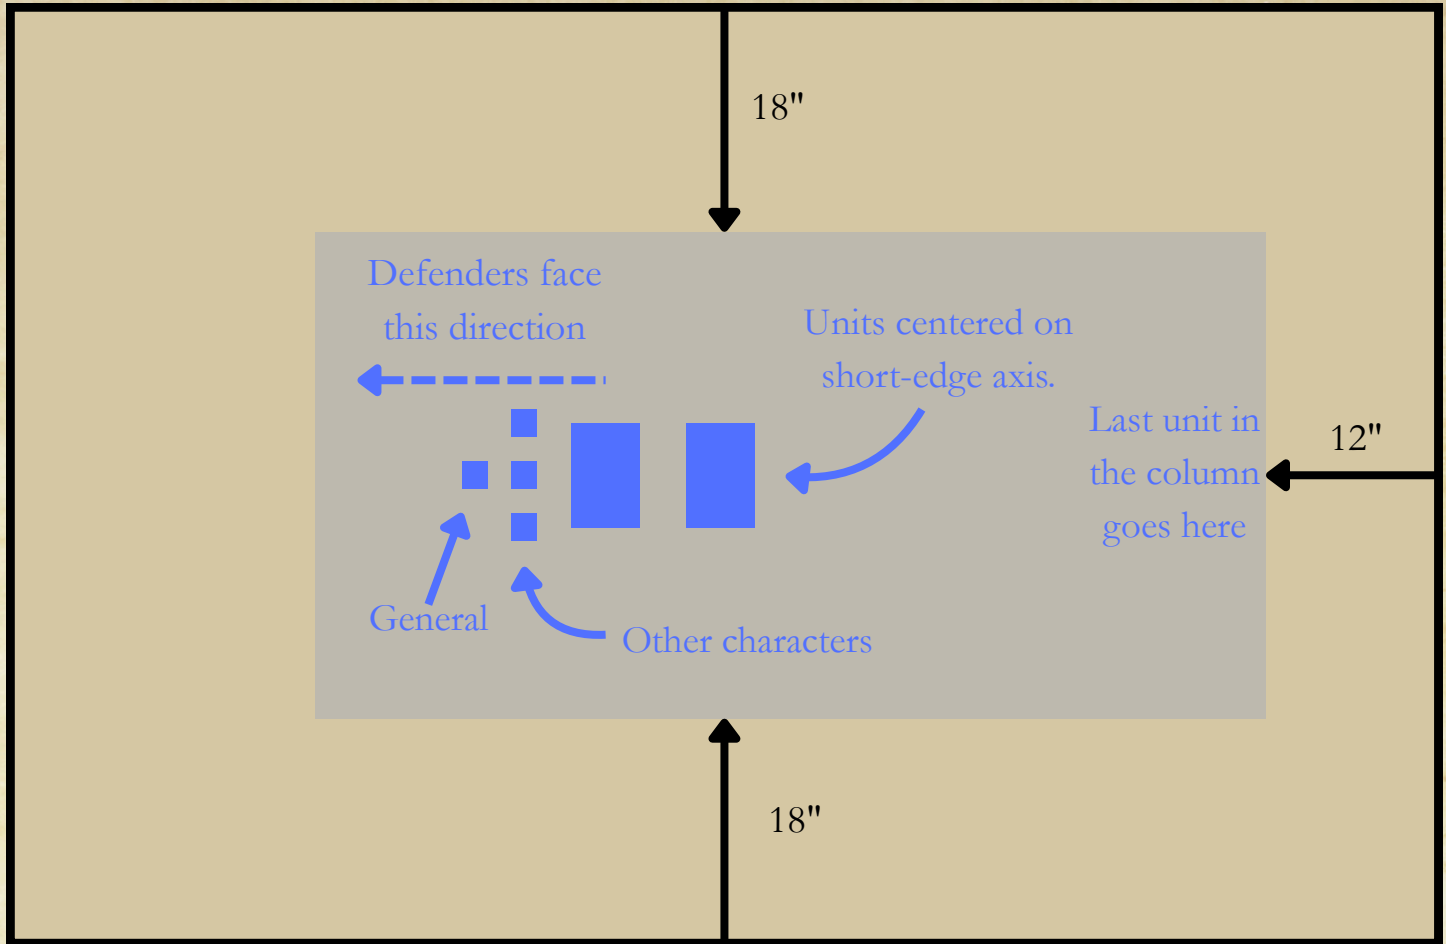

Victory!

Victory points are scored as follows:

- The attacker wins 1 VP if the baggage is destroyed.
- Whichever side controls the baggage train at the end of the game wins 3 VP (if it is not destroyed).
- If the messenger moves off of the board, the defender wins 2 VP.
- If the messenger is within 6" of a board edge at the end of the game, the defender wins 1 VP.
- If the messenger is killed, the attacker wins 1 VP.
- For each of the defender's characters (excluding the messenger) and banners (including the BSB) that are killed in combat or run down, the attacker wins 1 VP.
- For each non-fleeing character that ends the game with at least one non-fleeing unit in command range, the defender wins 1VP.
- For each non-fleeing banner that ends the game within command range of a non-fleeing character, the defender wins 1 VP.

The player with the most VP wins 3 goal points, the other gets 1 goal point. Each player gets 2 goal points in a tie.

Ambush!

Deployment

The Defender deploys first, then the Attacker. Scouts, vanguard, and ambush cannot be used.

Defender's Deployment

The defender is in a marching column when ambushed.

- Every unit must face the same direction.
- Every unit must be centered in the middle of the short-edge of the board and cannot be closer than 18" to the long board-edge.
- The last unit in the column must be exactly 12 inches from the board edge.
- The first unit in the column is the general, with all other characters in a rank behind him. Each character is 1" apart.
- Each unit is 3" apart (except for the first, which is 1" behind the characters)
- The baggage train must follow all the above rules but can be anywhere in the column the Defender chooses.

Attackers' Deployment

The attacker can deploy anywhere 12" away from the attackers. If they are in the Defender's General's front arc, they must be 18" away.
