

Found Inland Colony

The warmbloods invade our lands! They trample the Great Plan! Resist, my fellow lizards, RESIST!

Game Length

The game lasts 6 Turns.

Deployment and First Turn

Roll off to determine who deploys first. Standard 12" deployment zones. *Scouts* are not allowed. The Attacker goes first.

Scenario Special Rules

Unexpected Guests

The Defender must keep 25% of their army (by points) in reserve. They enter the battle using the *Ambushers* rule.

Settlement on Wheels

The supplies and civilians necessary to found the new colony are represented by a special baggage train.

- This baggage train is a light chariot with M7, 10W, T5, 4+ armor, and *Magic Resistance* (1).
- It cannot march, flee, or attack.
- Models may only direct their melee attacks at the baggage train if they are not in base-to-base with an enemy model.
- It may freely pivot up to 90° at the start and end of its move. It may move away from combat.

Scenario Special Rules (Continued)

Founding the Colony

At the start of Turn 3, the Attacker must found the colony. To found the colony, the baggage train must be wholly outside the Attacker's deployment zone and in open terrain.

The baggage train cannot move for the rest of the game. At this point, the Attacker may erect four low-linear obstacles anywhere within 6" of the baggage train.

Victory!

If any of the following occur, the Defender wins and the nascent colony is destroyed. Otherwise, the Attacker wins and the colony is founded.

- The baggage train is not wholly out of the Attacker's deployment zone at the start of Turn 3.
- The baggage train is destroyed.
- More than 80% of the Attacker's army (by points) is destroyed or has fled off of the table.

Both players receive two goal points at the end of the game.
